

TOUR DE COU SPÉCIAL SRT

ELASTIC NECK LOOP
FOR SRT

REF.

FTC/TSRT

FTC TREE

[EN]

1 PRODUCT DESCRIPTION

This elastic neck loop will hold the chest ascender upright and taut during SRT ascent (single rope). The length can be adapted to any stature. It is easy to use, no need to take off the helmet. Practical, compact and ultralight, it is also quickly stored away.

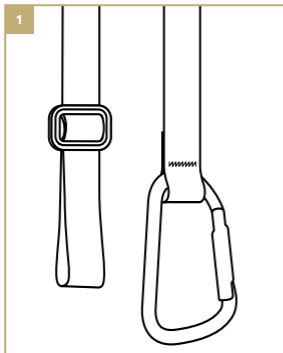

[EN]

2 TECHNICAL DATA

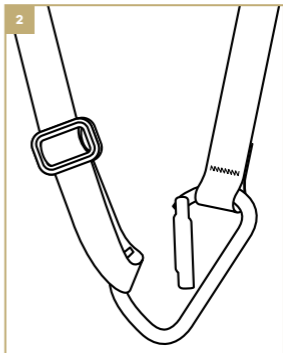

The length is adapted with the plastic slider. Flat rubber band 28 mm large, woven from polyester and cotton.

[EN]

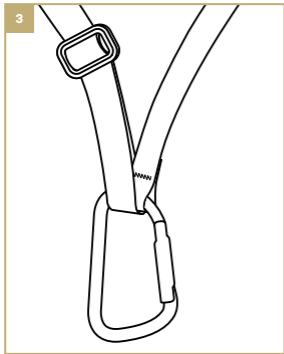

3 SETTING UP

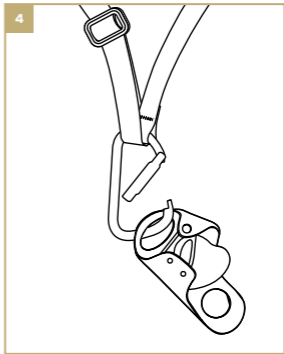

Slide the carabiner in the smaller loop, then lay the rubber band flat in front of you (still open).

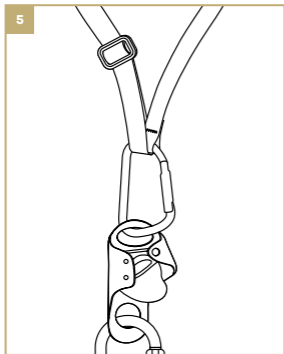

Pass the band behind your neck, laying both carabiner and larger loop on your chest.

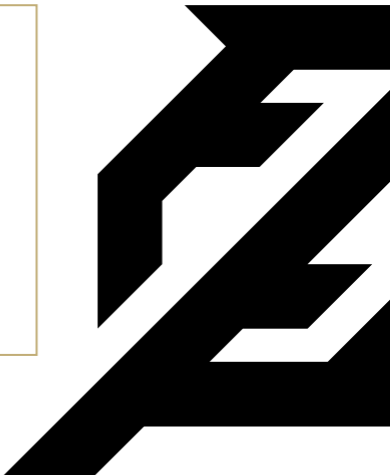

Slide the carabiner in the larger loop, overlaying on the smaller one.

Clip the carabiner on the chest ascender.

Adapt the length with the slider.

WORK HARD.
CLIMB HARD.
PLAY HARD.
