

## FELCO 810 Expert

Electric pruning shear - Model for larger diameters

Designed in Switzerland by FELCO

35mm/1.4in. 270mm/10.6in. 870g/30.7oz.

- This model is recommended for cutting very hard wood and for large diameter branches. The new geometry of the blade and counter-blade offers incredible cutting strength. Despite this power, its ergonomics remain flawless: it has great maneuverability and relieves the strain on arm and shoulder muscles. The battery weighs less than two kilos and has enough charge for roughly one full day of pruning; it recharges in about five hours. The storage bag may be worn on the belt or with a shoulder strap.

Our recommendation (1★: Recommended, 2★: Strongly recommended, 3★: Best fit)
