

NOTCH RC GRAPPLE TETHER REPLACEMENT

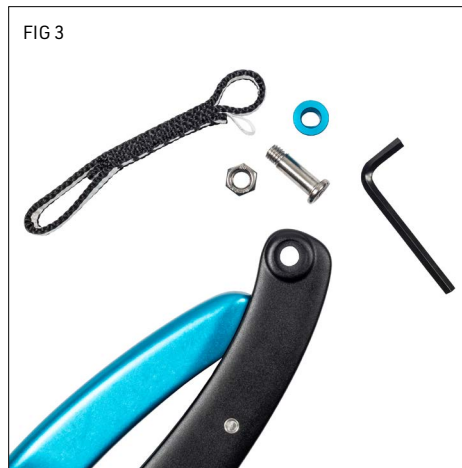

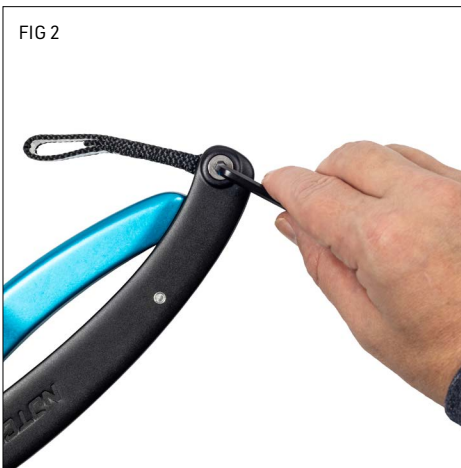

If your tether starts to wear, you can replace it with a “rock climbing” Quickdraw sling/tether with a max diameter of 12mm.

ROPE REPLACEMENT

If you prefer to use your RC Grapple with a dedicated rope, you can attach a sewn/spliced eye directly to the grapple. (Figure 1)

HOW TO:

- Simply unscrew the bollard screws and remove the tether. (Figure 2 and 3)
- Attach your rope sewn or spliced eye to the bollard and reassemble (Figure 4). We recommend adding a dab of loctite when reinstalling the bollard.

(Compatible with standard rope sizes 8-12.9mm)
