

# Blue 32

## EXPERT TREE CARE

*"I really like Blue 32. I enjoy the knotability of the rope! I also like how the rope stayed round even if it flattened out while under tension. It was smooth in double rope and smooth tending with the Akimbo on DdRT."*

– Ricardo, Certified Arborist, TreeCareLA

## YALE-32

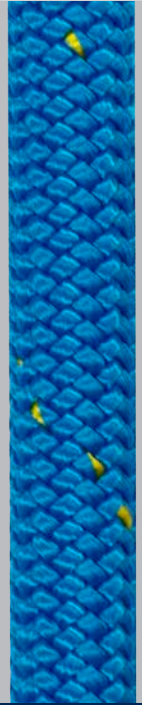

Blue 32 is an arborist climbing rope designed to deliver superior performance across a range of climbing systems. Its 32 carrier construction ensures smooth handling, whether using mechanical systems or traditional hitch cord climbing. This rope offers a static yet flexible feel, making it easy to knot, while the durable 32-strand cover and braided polyester core offer long-lasting durability. Blue 32 comes equipped with a patent pending low-profile splice that allows the rope to easily fit in common climbing hardware such as ZigZags. Blue 32 is versatile and reliable for both SRS and MRS climbing.

✓ PATENT PENDING  
LOW PROFILE SPLICE

✓ DESIGNED FOR  
SRS & MRS CLIMBING

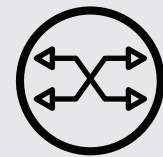

✓ PROUDLY  
MADE IN USA 

XTC-32: Blue 32	Rope Information
Diameter	11.5mm, 11.7mm
Construction	32-Strand Double Braid
Material (Cover)	High-Performance Polyester
Material (Core)	Braided Polyester
Splice Break Strength	5,000 lb.
Weight	Blue 32 11.5mm 6.4 lb/100 ft Blue 32 11.7mm 6.9 lb/100 ft
Elongation	Low
Available Lengths	45m (150ft.), 60m (200 ft.), 183m (600ft.) Reel
Color Options	11.5mm – Solid Blue, 11.7mm – Solid Blue with Yellow Tracer
Splice Compatibility	Patent-Pending, High Strength, Low-Profile Splice

**Blue 32 - 11.5mm**  
 (Solid Blue)

**Blue 32 - 11.7mm**  
 (Blue with Yellow)

**FLEXIBLE CONSTRUCTION**

Blue 32 is designed to be soft, flexible and easy-to-knot. This Rope maintains shape even after tension has been applied.

**MRS & SRS CLIMBING**

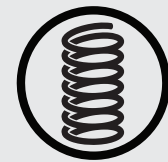

Blue 32 is extremely versatile, making the rope suitable for both SRS and MRS climbing techniques.

**LOW PROFILE SPLICE**

Patent-Pending high-strength low-profile splice that easily fits through mechanical devices and popular climbing hardware. This new splice is debuting on Yale 32 Strand ropes.

**DURABLE COVER**

32-strand high-performance polyester cover protects the core yarn of the rope and ensures longevity.

**LOW ELONGATION**

This 32-strand arborist climbing line offers static, low-bounce characteristics and lower elongation than other 32-strand options, providing climbers with greater stability and control.
