

Since launching the worlds first Triple-action Saphook in early 2011, sales have been better than even we expected. So when we received enquiries for a swivel version we had to accept the challenge!

The NEW Swivel Saphook Range– UNIQUE to I|S|C

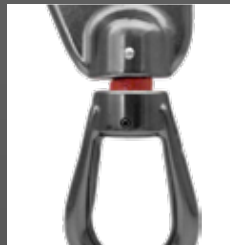

Doubleaction mechanism

Triple-action mechanism

Whether this be used on the end of Arborist Fliplines (SH905 non load-indicating), or for use on the end of Fall-arrest Blocks and SRLs (SH905i load indicating) -or for something else we haven't come across yet, its a great addition to the range.

...and for all those retailers and users out there who hate to see innovations being ripped off, you will be pleased to know that we've patented this. So let us know if you see a copy and we'll happily set our lawyers on them !

Fall -indicator available - indicator ring is exposed when a fall occurs

Available with Doubleaction or Triple-action mechanism

Safety Heel to further reduce the risk of accidental opening

Blind nose to reduce rope snagging
